Hakkımızda

PROJE ZAMAN AKIŞI

Hassas İşçilik

Ürün modelleri profesyonel modelleme programları aracılığıyla modellenir, imalattan önce 3 boyutlu yazıcılar ile prototip baskıları yapılarak kontrolleri sağlanır ve hassas üretime geçilir.

Kalite Kontrol

Güvenilir kaynaklardan temin edilen hammaddeler; "boyut/yüzey/kimyasal" kontrolleri yapılarak üretim prosesine kullanılmak üzere kalite kontrol ekibi tarafından onaylanır.

01 Hammadde Temini

Hammaddenin doğru ve istenilen kalitede olması birincil arayışımızdır. Bu noktada hammaddede **30 yıllık aşkın ticari tecrübemiz** ile en güvenilir firmalardan temin edilir...

02 Hammadde İşleme

Birinci kalite olduğu; kalite sorumlusu tarafından onaylanan hammaddede için ilk işlem, istenilen formlara bölünmesidir. Burada hammaddede hidrolik giyotin makasından geçerek dilimlenir.

03 Hammadde Mamule Dönüşüm

İstenilen ürün için özel boyutlarda dilimlenmiş hammaddede, artık ilk formunu ve yapısını almaya hazırdır. Bu noktada profesyonel pressler sayesinde kaba formunu kazanmış olur.

04 Mamul Son İşlem

Kazanılan ilk form; son detayların kazandırılması için yolculuğa devam ediyor. Bu aşamada delikler, perçinler, bükümler gibi işlemlerden geçerek son mamul halini alır.

05 Son Mamul Montaj

Üretimde, çeşitli işkencelerden geçerek, yapısal ve teknik tüm detaylarıyla mükemmel yapısına ulaşan ve kalite ekipleri tarafından hassas gözlemlerle onaylanan mamuller montaj için profesyonel ellere teslim edilir. Bu noktada kaynak işlemleri, ek yan ekipmanlar gibi eklentilerle son halini alır ve paketlenerek depoya sevki yapılır.

06 Depolama & Sevkiyat

Her detayı ile profesyonel bir ekip tarafından hazırlanan son mamuller, paketlenmiş bir şekilde depolanır. Ve siparişe göre özel olarak paketlenir. sevkiyat için güvenlik ve dayanıklılık göz önüne alınarak kutulanır veya paletlenir.
